1. The following is an examiner's statement of reasons for allowance: the Examiner has not found any prior art that would render obvious the claimed system and method including an array weight generator that generates array weights based on virtual signals, which are based on the spatial signature of interference signals to be cancelled, and spatial signatures of desired signals.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sano (6,882,681) discloses a spread spectrum receiver capable of detecting and canceling multipath waves. Hiramatsu (6,498,928) discloses a receiver including a combiner 121 for combining weighted signals wherein the weights are derived after determining the channel with the largest received signal from among a plurality of delay profiles generated by suppressing interference. Kobayaka et al (6,064,338) disclose a base station antenna array receiver including a searcher 3, adaptive weight controller 4, weighting and combining means 5. Tanaka (2003/0003890) disclose a receiving method and receiver that continues to carry out weight calculations with stability and without erroneous convergence even in a communication environment where desired and interference waves come from nearly the same direction. Tanaka et al (6,493,379) disclose an antenna receiver that estimates direction of arrival information in generating the weights for the beamformer.

3. . Tong et al (2004/0013094) is a related application of the applicants.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gregory C. Issing whose telephone number is (571)-272-6973. The examiner can normally be reached on Monday - Thursday 6:00 AM- 4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Tarcza can be reached on (571)-272-6979. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
